PROFILE SUMMARY

Experienced freelance copywriter specializing in cold email campaigns, with a proven ability to craft persuasive, high-converting messages that drive engagement and generate leads. Skilled in creating personalized, results-driven content tailored to diverse industries, including SaaS, e-commerce, and consulting. Alongside this, I bring hands-on experience in Python-based machine learning and data science, having built and deployed predictive healthcare models covering disease diagnosis and medical image analysis. I combine strong communication, data-driven thinking, and project management skills to deliver impactful, measurable results across both marketing and technical projects.

AREAS OF EXPERTISE

- Cold Email Copywriting
- Lead Generation Campaigns
- Email Marketing Strategy
- Persuasive and Conversion-Focused Writing
- Audience Research and Personalization
- SaaS, E-commerce, and B2B Messaging
- A/B Testing and Performance Optimization
- Sales Funnel Development
- Python Programming & Machine Learning
- Data Analysis (SQL, Data Visualization)
- Client Communication and Collaboration
- Project Management for Freelance Projects

WORK EXPERIENCE

Freelance Copywriter — Cold Email & Email Marketing

Dec 2021 – Present

- Crafted high-converting cold email campaigns for clients across industries such as SaaS, e-commerce, and consulting, resulting in increased lead generation and client engagement.
- Developed personalized and persuasive email content tailored to target audiences, achieving an average open rate of 78% and click-through rate of 84%.
- Collaborated closely with clients to understand their brand voice, business goals, and target demographics, ensuring alignment in messaging and strategy.
- Conducted in-depth audience research to create compelling narratives that resonate with prospects and drive action.
- Managed multiple projects simultaneously, consistently meeting tight deadlines and delivering measurable results.
- Utilized A/B testing and performance analytics to optimize email campaigns and improve conversion rates.
- Built long-term relationships with clients by delivering consistent value and exceeding expectations.

Key Achievements:

- Increased client lead generation by 90% through targeted cold email campaigns.
- Improved email open rates by 86% and click-through rates by 95% for a SaaS client within 3 months.
- Successfully scaled cold email outreach for an e-commerce client, resulting in a 98% boost in sales inquiries.

DATA SCIENCE & MACHINE LEARNING PROJECTS

Breast Cancer Detection & Diagnosis App

- Built a machine learning application using Python and scikit-learn to predict breast cancer diagnosis (malignant or benign) from patient diagnostic data.
- Applied data preprocessing, feature analysis, and visualization tools to improve model accuracy and interpretability.

Brain Tumor Detection System

- Developed a deep learning system to detect and classify brain tumors from MRI scans, providing fast and accurate diagnostic support.
- Implemented image preprocessing and a convolutional neural network pipeline to analyze medical imaging data.

Chronic Kidney Disease (CKD) Diagnostic Model

- Built and deployed a machine learning model, delivered as an interactive Streamlit web app, to predict Chronic Kidney Disease from patient clinical data.
- Handled end-to-end workflow: data cleaning, model training, evaluation, and deployment for real-time predictions.

EDUCATION

University of Nigeria

Dec 2022 – Present

B.Eng. Biomedical Engineering

Relevant coursework: Bioinstrumentation, Orthosis, and Prosthesis.

TRAININGS & CERTIFICATIONS

- Data Analysis Bootcamp (SQL) — 2025
- Python Programming Bootcamp
- Designing of a Prosthetic Arm — 2024
- Building and Coupling of an ECG Signal Detector — 2024
